Request for quote: penetration test of SES Labs

From: SyncLytics, publisher of SES Labs (contact: name, e-mail and phone to be filled in) **Reply by:** date to be filled in · **Preferred test window:** month to be filled in

SyncLytics invites qualified firms to quote for a **grey-box penetration test** of SES Labs. SES Labs is business software for Ghanaian retailers and businesses: back office, point-of-sale till (works offline), online shop and API. It will be installed on customers' own servers and reachable over the internet. We want an independent test before the first customer goes live.

What we ask for

- **A grey-box test of a dedicated test copy at our premises in Ghana,** with made-up data. Testers can work either:
  - on site, on our test network; or
  - remotely over a VPN that we provide.
- **The full scope, rules and deliverables** are in the attached *Scope and rules of engagement*. Please read it before quoting.
- **Retest:** one free retest of the fixed findings within 60 days.

Size, so quotes are comparable

Item	Size
Web application (back office)	About 170 screens; 9 test roles (company, branch and IT levels) to test against each other; 2 companies on one server (isolation test)
Till, kitchen-display, warehouse-handheld and sync API	About 75 endpoints, plus device pairing and PIN sign-in
Public REST API	14 endpoints, OpenAPI description supplied
Online shop	6 endpoints
Incoming webhooks, licence check-in, prints and downloads	About 20 endpoints
Server	1 Windows machine as installed by our installer
Desktop till	1 Windows app

What your quote must include

1. **Testers.** Name each tester and give their certifications. We require **at least one tester holding OSCP, OSWE, CREST CRT/CCT or an equivalent recognised certification**. Please also send CVs. The named testers must do the work; a substitute needs our agreement.
2. **Method.** Confirm testing follows **OWASP WSTG**, with checks against **ASVS 4.0 level 2** and the **OWASP API Security Top 10**, and severity rated with **CVSS 3.1**.
3. **Effort.** Days per area, using the table above, with on-site and remote options shown separately.
4. **A sample report** from a past engagement, with client details removed.
5. **Price** in GHS or USD, with what it includes:
   - retest;
   - travel, for an on-site test;

    - VAT and levies.
6. **Lead time** to start, and the time from the end of testing to the draft report.
7. **Legal.** Professional indemnity insurance, willingness to sign our mutual NDA, and your data-handling and destruction policy.
8. **References.** Two clients we may contact, preferably for business or financial software. For firms outside Ghana, also say how you handle Ghana's Data Protection Act, 2012 (Act 843) and remote access across borders.

How we will choose

Criterion	Weight
Tester qualifications and relevant experience	35 %
Method and quality of the sample report	25 %
Price	25 %
Lead time and availability for the retest	15 %

We will ask at least one Ghana-based firm and one international firm to quote. We may hold a short call with shortlisted firms before deciding.
